

Nutritional Supplement

B₁B₂ vet

Vitamin B1 & Vitamin B2

Composition

Each bolus contains:

Thiamine (Vitamin B1) : 500 mg

Riboflavin (Vitamin B2) : 200 mg

Pharmacology

Thiamine (Vitamin B1) and Riboflavin (Vitamin B2) play an important role in the metabolism of carbohydrate, protein & fat and also involved in the breakdown of glucose for energy. Like all B-Complex vitamins, Thiamine and Riboflavin are water soluble. These are rapidly absorbed and excreted from the body, and requires regular supplementation in hard working animals when dietary input may be low.
